

## Future Problem Solving of Virginia 2018 - 2019 Training Workshops

### **FPS Process - 9:00 AM - 3:00 PM**

Whether you are a coach with no experience or one with many years of experience, this workshop is for you. New coaches will learn the FPS six-step process and how it is applied in the competitive components - Global Issues Problem Solving (GIPS), Community Problem Solving (CmPS), Scenario Writing and our *newest* component, Scenario Performance- or as an introduction to the process for use in the non-competitive Action-Based Problem Solving component. Experienced coaches will learn strategies within the process for improving their understanding of how to improve their teams' understanding of the process and how to apply this competitively. Participants will learn key tips for the successful integration of Scenario Writing, CmPS or Scenario Performance, and how the FPS process is integrated in each.

### **Evaluator Training 9:00 AM - 3:00 PM**

Understanding of the evaluation process provides novice coaches, as well as experienced coaches, with an understanding of the authentic scoring procedures used to provide feedback to the Global Issues Problem Solving teams and individuals. An understanding of this process allows coaches to provide teams with accurate information with regard to improving their use of the FPS process.
